I'm Amr Khaled, a computer science student with a deep passion for technology, design, and creativity. I started my journey with video and photo editing, and social media management, but over time, I found my true passion in coding and UI/UX design. Now, I focus on building apps and websites that are both functional and visually appealing. Beyond tech, I have a creative side, I enjoy music production and always love learning new things. Whether it's designing a sleek UI, coding a new feature, or experimenting with sounds, I'm always exploring new ways to express myself and improve my skills. I believe in constant growth and innovation, and I'm always looking for new challenges to push myself further.

EDUCATION

Student, *Galala University* ⧉

2024 – present
Attaka , Suez., Egypt

PROFESSIONAL EXPERIENCE

Freelancer

2021 – 2023

Worked as a multiskilled freelancer handling creative and technical tasks for clients across different industries.

- Edited videos and photos professionally using tools like Adobe Premiere Pro and Photoshop, delivering high-quality content tailored to each client's needs.
- Managed social media accounts by creating content, scheduling posts, and analyzing engagement to grow online presence.
- Provided IT support including troubleshooting software/hardware issues, optimizing systems, and helping clients stay productive and secure.
- Developed strong client communication, problem-solving, and self-management skills by handling projects independently.
