## Summary

---

Computer Science student (Galala University) and versatile freelancer with proven success across mobile & web development, UI/UX design, multimedia production, and IT support. Skilled at translating client needs into practical solutions while balancing technical precision with creative problem-solving. Recognized for adaptability, communication, collaboration, leadership, critical thinking, and strong client relations. Consistently delivers projects on time, within scope, and with measurable impact.

## Experience

---

### Freelancer – Creative & Technical Freelancer

2021–2023

Delivered 60+ multimedia projects (video/photo editing) and executed social media campaigns that increased client engagement by 25% and grew combined follower counts to 50K+.

- Developed and deployed 5+ small-scale web and mobile applications; solved complex IT issues, boosting system uptime by 20% and enhancing user satisfaction.
- Edited 20+ hours of promotional and educational video content, applying creativity and attention to detail for modern, engaging results.
- Managed 90+ client projects end-to-end, maintaining a 100% on-time delivery record while ensuring clear communication and strong client relationships.
- Achieved 95%+ client satisfaction rate, with repeat business and referrals demonstrating reliability, trustworthiness, and professional client handling.

## Education

---

### B.Sc. Computer Science, Galala University

- GPA: 3.6

## Languages

---

- Arabic — Native
- English — C1 (Fluent)
- German — A2 (Basic)

## Technologies

---

**Programming Languages:** C++, C, Java, Objective-C, C#, SQL, JavaScript (ES6+), Kotlin, HTML5, CSS3

**Frameworks & Tools:** .NET/ASP.NET, Android Studio, Android Jetpack (LiveData, ViewModel), Retrofit, Room, Xcode, Interface Builder, React, Node.js/Express, Firebase, Git/GitHub, Docker, REST APIs, GraphQL, Microsoft SQL Server, SQLite, Figma, Adobe Photoshop, Adobe Premiere, CI/CD (GitHub Actions)

## Training & Courses

---

- Git & GitHub Crash Course — freeCodeCamp
- Figma UI Design — DataCamp
- AWS Cloud Practitioner (CLF-C02) — DataCamp
- Android Studio / Kotlin — Self-study projects

## Projects

---

### Clip01 — Video Downloader Website

Solo project, Jan 2025

Designed and implemented a frontend + lightweight backend for video downloading/conversion, optimized for fast UX and reliable file handling.

- Reached 200+ active users within launch month through organic sharing; gathered user feedback and improved reliability by 15%.

### VITA — Vital Intelligence for Treatment & Access

University project, May 2025

Led UI/UX and frontend design for a healthcare web app, enabling 200+ patient records to be analyzed with AI-driven blood test interpretation.

- Collaborated with a 4-member team, applying problem-solving, leadership, and client-style communication skills to integrate ML outputs into dashboards.

### University App — Student Portal

2024–2025

Built core features (schedules, grades, notifications) and prototyped workflows in Figma, improving student task efficiency by 30%.

- Piloted by 100+ students during testing; incorporated feedback loops that boosted usability satisfaction by 20%.

### PDF Editor (Android)

Personal project / In progress

Designed an Android app to view, annotate and edit PDFs; optimized load performance by 30% using custom libraries.

- Integrated client-oriented design thinking by prioritizing intuitive workflows and responsive UI.

### i3 Chat — P2P Chat (Wi-Fi Direct / Bluetooth)

Prototype

Developed a peer-to-peer messaging app using Wi-Fi Direct/Bluetooth for local chat without internet, focusing on connection stability and polished message UI.

- Conducted peer testing with 20+ users, showcasing communication, adaptability, and strong attention to user experience.
